Judging specifications must follow those of the qualifying class in performance championships.

- a. If an entry must withdraw from a qualifying class due to equipment failure or inability to fix a shoeing issue during the class, that entry may be eligible for the Championship provided the show has not limited the Championship to qualifying class ribbon winners.
- b. Entries in an in-hand or breeding class do not qualify for a performance championship unless the show sets special criteria to include such classes.
- c. Junior Breeding or In-Hand Championships are to be offered for two-year-olds and under; Senior Breeding or In-Hand Championships are to be offered for three-year-olds and over.

d. In Breeding Championships, the Champion and Reserve Champion may be awarded either to the first and second place horses from the qualifying class, or by other means indicated in the prize list. If the first or second place winners from a qualifying class choose not to compete for the Championship or be disqualified, the horse with the next highest placing in the qualifying class shall have the option of moving up for the Championship and Reserve only.

#### **SC607 Division of Classes**

Classes can be divided by sex of the horse or rider, age of the horse or rider and/or status of the rider (ie. Amateur or Professional classes may be offered).

#### **SC608 Showing Stallions**

Whether stallions may be shown will be determined by the breed and/or discipline for which they are competing.

#### **SC609 Showing Ponies**

- a. Ponies may not be shown as a horse in one class and a pony in another class at the same show.
  
- b. Ponies who are shown in a class restricted to a horse (if pony classes are offered at said show) may not be shown as a pony the rest of the show year unless the pony is under new ownership.

### **SC610 Hors de Concours**

Show Management may permit an exhibitor to show a horse Hors de Concours (unjudged). If a horse is shown Hors de Concours, that horse cannot be shown for a prize in the same ring on the same day. However, the rider of an Hors de Concours horse may compete in subsequent classes.

### **SC611 Managing the Schedule**

From time to time, it may be necessary to change the schedule. It is incumbent on the manager to work with all affected exhibitors to negotiate such changes and to ensure those changes are posted and announced.

- a. When the start of a class is delayed due to an exhibitor not being ready, or horses not showing up, a warning will be issued with two minutes time to report.
- b. A class may be cancelled if entries do not show up for their scheduled ride times.
- c. In classes which compete collectively, officiating may not begin until the gate is closed or at the end of the two-minute call.
- d. An order of go should be established in classes where horses compete individually.

	<p style="text-align: center;"><b>Rules &amp; Guidelines</b> A Nonprofit Network of Horse Shows EquineSportsCouncil.org 1-855-Equine1</p>	<p><b>Page:</b> 52 of 111 <b>Year:</b> 2020 <b>Version:</b> 3.1 <b>Date:</b> 12/21/19</p>
---	---	---

- e. It will be the responsibility and authority of management to determine whether to stop a performance due to inclement weather and/or emergency situation using the following guidelines:
1. Management will advise how the show will reconvene once conditions support such.
  2. Management should make every effort to communicate and work with the exhibitors on the best plan forward.
  3. If the show must be delayed a day which exhibitors did not expect to show, the horse show should provide some relief to the exhibitors, if not to refund all fees.

### **SC612 Time-Outs**

- a. An exhibitor may request one time-out during a class which may last up to five minutes.
- b. To request a time-out the exhibitor should go to the center of the ring and get the attention of the ring master or judge.
- c. When a shoe is cast, the five minutes will begin once the farrier starts to reapply the shoe.

---	--	--

- d. Two attendants may assist the exhibitor during the time out.
- e. A judge may request a time-out for an exhibitor if he believes one is warranted.

**SC613 Warm-up and Schooling Areas**

Shows must provide adequate warm-up and schooling areas which include the necessary equipment for scheduled classes. Such must be properly lit if exhibitors will be utilizing these areas after sunset.

**SC614 Attention Devices**

Devices used to arouse attention from a horse (excluding proper use of a whip) are prohibited during warm-up and show sessions. Such devices include but are not limited to: Tape measures, firecrackers, fire extinguishers, sirens, horns and other noise making devices.

**SC615 Accidents, Injuries or Fatalities**

In the event of a human injury requiring medical treatment and/or results in fatality, notification to local authorities and insurance providers must be made immediately. The show should not continue without approval from local/state authorities. In the event of horse fatality or serious injury show management should consult with the vet and follow recommended protocol. Shows must notify ESC of all human fatalities and provide a police report within 24 hours.

- a. If an exhibitor is suspected of having a concussion upon evaluation by appropriate medical personnel, they may return to show upon providing a signed release from a licensed physician.
  
- b. A show may restrict a rider/driver from competing if suspected of having a concussion.

### **SC616 Workouts**

All horses chosen for a workout must be worked both ways of the ring at each gait asked for by the Judge. This does not have to include all gaits requested during the initial class.

- a. Workouts shall be judged as a new and separate class.
  
- b. The horses in the workout may be used by the judge(s) for any or all placings.
  
- c. If an exhibitor recuses himself from the workout for any reason, they may be awarded the last ribbon in the workout. In the case of more than one exhibitor asking to be recused, the fall of the cards will be the placings.

### **SC617 Possible Violation**

## CHAPTER 7 - WELFARE

Equine Sports Council has a zero tolerance policy towards individuals who put the welfare of animals and/or humans at risk. It is against US Federal law for individuals to witness or participate in the activities that compromise the Welfare of Humans or Animals and not report it to government authorities.

### **WL701 – Harassment or Assault**

Of any kind is illegal in every state, and **MUST** be reported immediately by calling 911. State and federal police are the only institutions legally permitted to investigate and convict those who commit these types of crimes. We strongly encourage all participants of ESC events to view these educational videos: <https://EquineSportsCouncil.org/safe>

a. **Bullying** by individuals or corporations either active, passive or cyber is not tolerated at any ESC event. 46 of the 50 US states have anti-bullying laws. If you are the witness or victim of bullying at an ESC governed show, please notify the Show Commission or ESC at 1-855-Equine1. For confidential help or advice with bullying issues, [StompOutBullying.org](http://StompOutBullying.org) is the national nonprofit help center.

### **WL702 – Violation of the ESC Drug & Medication Policy**

Constitutes risks to animal welfare and may result in loss of ribbons, suspensions and/or fines.

### **WL703 Cruelty, Abuse or Inhumane Treatment of Horses**

Individuals at an ESC exhibition may not abuse or inhumanely treat a horse. Any inhumane actions against a horse may constitute elimination from the show, or other actions deemed appropriate by the show officials and/or the ESC upon receipt of reports from the show officials.

### **WL704 Horse Protection Act**

Equine Sports Council encourages all participants to be knowledgeable and follow the guidelines established in the Horse Protection Act of 1970.

<https://www.congress.gov/bill/116th-congress/senate-bill/1455/text>

### **WL705 Horse Inspections**

The Show Manager or Steward may request a veterinarian to inspect any horse on the grounds should there may be signs of lameness, soundness or animal welfare concerns. Refusing to allow a veterinarian to inspect the horse may be cause for elimination from the show and/or further action deemed appropriate by the Show Commission upon receipt of reports from the show officials.

- b. Tying a horse in a manner to cause undue discomfort or distress in a stall or trailer.
- c. Letting blood from a horse without medical reason to do so.

## **CHAPTER 8 - DRUGS & MEDICATIONS POLICY**

### **DM801 Drug Testing**

Horse Shows affiliated with ESC have the right to drug test any horse on the show grounds in the event there is an animal welfare concern, and will provide results of those tests to government authorities where required by law. ESC recommends drug testing to shows with 500 or more entries. ESC will randomly select 10% of the horses exhibiting for drug testing by a licensed veterinarian. Horses exhibiting in the Academy divisions are not candidates for random selection unless there is an animal welfare concern.

### **DM802 Medication Classifications & International Standards**

ESC subscribes to the Uniform Classifications for Foreign Substances developed by the Racing Consortium International (RCI). Testing specifically targets performance enhancing drugs. A positive test result in Drug Classes 1-3 will result in penalties. Therapeutic substances in Drug Classes 4 and 5 may be permitted if used responsibly. ESC contracts with internationally certified equine drug testing labs and utilizes “*chain of custody control*” standards set forth under the International Standards Office (ISO).

## DM803 Banned Medications – Performance Enhancing

- **CLASS 1: Stimulant & Depressant**  
drugs that have the highest potential to affect performance and that have no generally accepted medical use in equines. Many of these agents are Drug Enforcement Agency (DEA) schedule II substances.

These include the following drugs and their metabolites:

**Opiates, opium derivatives, synthetic opioids and psychoactive drugs, amphetamines and amphetamine-like** drugs as well as related drugs, including but not limited to **apomorphine, nikethamide, mazindol, pemoline, and pentylenetetrazol**. Though not used as therapeutic agents, all DEA Schedule 1 agents are included in Class 1 because they are potent stimulant or depressant substances with psychotropic and often habituating actions. This class also includes all **erythropoietin** stimulating substances and their analogues.

- **CLASS 2: High Potential to Affect Performance**, but less of a potential than drugs in Class 1. These drugs are 1) not generally accepted as therapeutic agents in equines, or 2) they are therapeutic agents that have a high potential for abuse. Drugs in this class include: **psychotropic drugs, certain nervous system and cardiovascular system stimulants, depressants, and neuromuscular blocking agents**. Injectable local

anesthetics are included in this class because of their high potential for abuse as nerve blocking agents.

- **CLASS 3: Potential to Affect Performance** in equines, but the pharmacology of which suggests less potential to affect performance than drugs in Class 2. Drugs in this class include **bronchodilators, anabolic steroids** and other drugs with primary effects on the autonomic nervous system, **procaine, antihistamines** with **sedative properties and the high-ceiling diuretics.**

#### **DM804 - Allowed Therapeutic Medications**

When used responsibly and in a controlled environment these medications have less potential to affect performance and many are required as health management regimens for equines. The practice of “Stacking Multiple” therapeutic medications can be a health risk to horses, and will result in suspensions and/or penalties. Please consult with your vet for correct dosing amounts.

- **CLASS 4: NSAIDs & Similar Therapeutic** that have less potential to affect performance than those in Class 3. Drugs in this class include less potent diuretics; corticosteroids; antihistamines and skeletal muscle relaxants without prominent central nervous system (CNS) effects; expectorants and mucolytics; hemostatics; cardiac glycosides and antiarrhythmics; topical anesthetics; antidiarrheals and mild analgesics. This class also includes the non-steroidal anti-

inflammatory drugs (NSAIDs), at concentrations greater than established limits.

- **CLASS 5: Localized Therapeutics** only, such as anti-ulcer drugs, and certain anti-allergic drugs. The anticoagulant drugs are also included.

### **DM805 Therapeutic Administration Guidelines**

The following thirteen drugs or medications are permitted (Exception: does not apply if prohibited by government regulations). Guidelines listed are applicable to most horses; however, all responsible parties are cautioned that they are only general guidelines. The suggested guidelines listed below should be followed to minimize the risk of toxicity and/or overdose.

**1. Phenylbutazone (an NSAID) (12 hours before showing)** Guidelines: When phenylbutazone is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 2.0 milligrams per pound of body weight should be administered, preferably less. For a 1,000 pound animal, the maximum daily dose is 2.0 grams, which equals two 1.0 gram tablets, or two 1.0 gram units of paste, or 10.0 cc of the injectable (200 milligrams per milliliter). In the event the phenylbutazone is administered orally, half of the maximum daily dose (1.0 gram per 1,000 lbs) should be administered every 12 hours (i.e., 12 hours apart) during a five day treatment program even if such oral administration occurs within 12 hours of competition.

	<p style="text-align: center;"><b>Rules &amp; Guidelines</b> A Nonprofit Network of Horse Shows EquineSportsCouncil.org 1-855-Equine1</p>	<p><b>Page:</b> 65 of 111 <b>Year:</b> 2020 <b>Version:</b> 3.1 <b>Date:</b> 12/21/19</p>
---	---	---

Phenylbutazone should not be used for more than five successive days.

## **2. Flunixin (NSAID) (12 hours before showing)**

**Guidelines:** When Flunixin Meglumine (Banamine®) is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 0.5 milligram per pound of body weight should be administered. For a 1,000 pound animal, the maximum daily dose is 500 milligrams, which equals two 250 milligram packets of granules, or one 500 milligram packet of granules, or 500 milligrams of the oral paste (available in 1,500 milligram dose syringes), or 10.0 cc of the injectable (50 milligrams per milliliter). The medication should not be used for more than five successive days.

## **3. Ketoprofen (a NSAID) (12 hours before showing)**

**Guidelines:** When Ketoprofen (Ketofen®) is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 1.0 milligram per pound of body weight should be administered. For a 1,000 pound animal, the maximum daily dose is 1.0 gram, which equals 10.0 cc of the injectable (100 milligrams per milliliter). The medication should not be used for more than five successive days.

**4. Meclofenamic Acid (NSAID) (12 hours before showing)** **Guidelines:** When Meclofenamic Acid is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 12

hours, not more than 0.5 milligram per pound of body weight should be administered, preferably less. For a 1,000 pound animal, the maximum 12 hour dose is 0.5 gram, which equals one 500 milligram packet of granules. The medication should not be used for more than five successive days.

**5. Naproxen (NSAID) (12 hours before showing)**

Guidelines: When Naproxen is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 4.0 milligrams per pound of body weight should be administered. For a 1,000 pound animal, the maximum daily dose is 4.0 grams, which equals eight 500 milligram tablets. The medication should not be used for more than five successive days. 88

**6. Diclofenac (Surpass) (NSAID) (12 hours before showing)**

Guidelines: Every 12 hours, not more than 73 mg of diclofenac liposomal cream should be administered (not more than 146 mg per 24 hour period) to one affected site. This 73 mg dose equals a 5-inch ribbon of cream not greater than 1/2 inch in width, which should be rubbed thoroughly into the hair over the joint or affected site using gloved hands. Do not apply diclofenac cream in combination with any other topical preparations including DMSO, nitrofurazone or liniments, and do not use on an open wound. Diclofenac cream should not be administered for more than 10 consecutive days.

**7. Firocoxib (Equioxx) (NSAID) (12 hours prior to showing)** Guidelines: When Firocoxib (Equioxx) is administered, the dose should be accurately calculated according to the actual weight of the animal. For a 1,000 pound animal, the maximum daily dose is 45.5 milligrams, which equals 0.1 milligram per kilogram of body weight once daily. Firocoxib (Equioxx) should not be administered for more than 14 consecutive days.

**8. Dexamethasone (24 hours prior to showing)** Guidelines: Whenever dexamethasone is administered, the dose should be accurately calculated according to the actual weight of the animal. These guidelines include several alternative scenarios for dose time and route of administration. a. Alternative Number 1. Each 24 hours, not more than 2.0 milligrams of dexamethasone injectable solution per 100 pounds of body weight should be administered intravenously or intramuscularly, preferably less. For a 1,000 pound animal, the maximum daily intravenous or intramuscular dose of dexamethasone injectable solution is 20.0 milligrams, which equals 5.0 milliliters of the injectable solution (4.0 milligrams per milliliter). Dexamethasone should not be administered for more than five successive days. b. Alternative Number 2. Each 24 hours, not more than 0.5 milligram of dexamethasone injectable solution per 100 pounds of body weight should be administered intravenously, preferably less. For a 1,000 pound animal, the maximum daily intravenous dose of dexamethasone injectable solution is 5.0 milligrams, which equals 1.25 milliliters of the injectable solution (4.0 milligrams per milliliter). Dexamethasone should not be administered

for more than five successive days. c. Alternative Number 3. Each 24 hours, not more than 1.0 milligram of dexamethasone powder per 100 pounds of body weight should be administered orally, preferably less. For a 1,000 pound animal, the maximum daily oral dose of dexamethasone powder is 10.0 milligrams, which equals one packet of dexamethasone powder (10.0 milligrams per packet). No part of this dose should be administered during the 6 hours prior to competing. Dexamethasone should not be administered for more than five successive days.

**9. Acetazolamide (24 hours prior to showing)** May only be administered to horses documented through DNA testing to be Positive (N/H or H/H) for HYPP (Hyperkalemic Periodic Paralysis). Guidelines: When Acetazolamide is administered, the dose should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 3 milligrams per pound of body weight should be administered. For a 1,000 pound animal, the maximum daily dose is 3 grams. 89

**10. Furosemide or Lasix (4 hours prior to showing),** when used, must be administered intravenously at least four (4) hours prior to competition.

**11. Isoxsuprine (4 hours prior to showing)** No part of a dose should be administered during the four (4) hours prior to competing. Any medicated feed should be consumed and/or removed at least four (4) hours prior to competition. Guidelines: When administered, the dose

should be accurately calculated according to the actual weight of the animal. Each 24 hours, not more than 1.6 milligrams per pound of body weight should be administered (usually divided in two equal doses given 12 hours apart). For a 1,000 pound animal, the maximum daily dose is 1,600 milligrams, which equals 80 20-milligram tablets.

**12. Lidocaine/Mepivacaine (24 hours prior to showing),** When administered within 24 hours of showing, may only be used under actual observation of event management (or designated representative) and/or the official show veterinarian, either of which must sign the medication report form, to aid in the surgical repair of minor skin lacerations which, by their very nature, would not prevent the horse from competing following surgery.

**13. Omeprazole/Ranitidine –** Are ulcer and gastro reflux medications which are permitted while showing.

## CHAPTER 9 – DISCIPLINE GUIDELINES

### DG901 Discipline History

For over 100 years horses have been exhibited in various disciplines and are considered concepts which cannot be copyrighted. Over the years each breed association developed guidelines that promote unique characteristics. Judges and Show Commissions have the final authority, and may reference other industry specifications in their decision making process.

- a. Types of Exhibitors by Level** – Each discipline includes PRO and non-PRO (Amateur) exhibitors. Performance achievement of the horse is of utmost importance when exhibited by a Professional. In all of the non-PRO classes, Manners and Suitability to the rider are of utmost important followed by Performance and Quality. Stallions can be shown in Youth, Amateur/Masters, and PRO, however not in Ladies, Juvenile or Equitation.
  
- b. Championship Best Practices** - ESC recommends drug testing and hoof measurement practices in championship classes for shows with 500 or more entries.
